An Unique American Art Deco Skyscraper Glass Rods Sconce

Reference:

MPD-003550
Description

623-ES Americana Art Deco Sconce
Very impressive, recreated, cast brass sconce with a hi/lo antique finish.
The clear glass tubes are staggered to repeat the Art Deco motif.
Originally: Circa 1920-30.
This is such a unique Art Deco Sconce...so out of the ordinary...and so into total design motif.
It mounts with one center screw to any UL approved electrical box (we supply the crossbar).
The socket is candleabra type, and we have used our candelabra LED bulb 35C-E12 with great affect. There is a mirror finish backplate behind the bulb to reflect as much light as possible so even our small LED bulb has a pleasing result.
All mounting hardware will be supplied with this sconce. This sconce does come supplied with a rotary switch. The great Art Deco knob can be seen on the backplate.
This sconce does make a statement all by itself. Not much more to say about this sconce other than to give you the measurements.
Measurements: Overall height is 12”. The backplate has a width of 4 3/8”. It projects into a room a mere 3 1/4”.
Price: $295.00 plus careful packing and shipping charges.
If you wish, we could glass-bead blast the glass tubes to give a more frosted appearance for a small additonal charge.

Price:

$295.00
