Laberinto Multiple Sculpture by Negret

Reference:

MPD-007940
Description
Title: Laberinto Múltiple
Technique: Painted aluminum
Year: 1986
Artist: Edgar Negret, Colombian artist

Like many of Negret's works, it is made of red painted aluminum, which gives the work a great presence. When one spends time observing each part of this sculpture, he thinks: How did Master Negret conceive this sculpture?

Really abstraction and space management, in addition to the curves of aluminum sheets joined with screws and nuts make these sculptures a great representation of abstraction and geometry.

Great management of space, geometry and abstraction of Master Negret represented in his beautiful works.
