# French Marseille 18 Light American Art Deco Chandelier

## Reference:

MPD-003551
Description

Four years of serious design have gone into creating one of the greatest deco chandeliers on the market today.  (see a fraction of the design process picture for interest).  As a further addition to our Marseille Art Deco Series this fine 18 light chandelier uses the same Marseille Series shade but is a larger than the 650-12L and a bit most impressive.

Two years ago we introduced 650-12L which is our twelve light chandelier .  Now we make it’s bigger

brother, the 650-18L, an 18 light chandelier on two tiers.

(we shouldn’t even discuss the giant brother 650-36L, half-way thru the proto-type stages,  which will be two tiers with 36 shades and have an approximate diameter of 66”...or monster brother 650-42L ...also in the proto-type stage,  which will have three tiers with 42 shades and also have 66” diameter.  But if one of these giants appeals,  it would be nice to hear from you to speed the process.  You know the old saying about a squeaky wheel.....)

This 650-18L chandelier has a diameter of 42" and a standard 45" in height.  This height could be changed to longer or shorter to suit various installations.  Be sure of your mounting...it does weigh in at approximately 130 lbs.  This large 18 light chandelier can be used with either incandescent bulbs or energy saving LED light bulbs.  Each of the 18 sockets is capable of a 100 watts or greater wattage bulb, so significant lighting results can be achieved.

We believe that this is the only Art Deco slip shade chandelier series of this size and scale on the market today.  It has been four years in development and we are very pleased with the continuing results and look forward to our even bigger versions.

Price:  $5,750 plus shipping.  Comes complete with the 18 shades, choosing either frosted or amber color and the mica inserts: amber or white mica.
