Carved Stone Sculpture Women and Men by Sam Grodensky

Reference:

MPD-006432
Description
Since the dawn of human history, we have felt the need to express our creative side. From the earliest surviving rock art and stone carvings to the gloriously refined sculptures and paintings we can produce today, our art continues to be a reflection of society, and of the different cultures we live in.

This carved stone made by Israeli artist SAM GRODENSKY depict a couple (man and woman). The man embraces the women and shows a deep relationship between them.
